

ANA DINIS

AI & Data Product Manager · Consultant

anaelenadinis98@gmail.com · +44 7743 739035 · [LinkedIn](#) · London, UK

PROFILE

A senior product manager specializing in AI, LLMs, and data platforms. They have a strong background in linguistics and a track record of leading high-impact data and AI products from concept to global deployment. They excel at bridging the gap between complex technical capabilities and commercial value, particularly within FMCG.

EXPERIENCE

Consultant — AI & Data Product Manager | Curve Analytics

Mar 2024 – April 2026

AI Capability Initiative · Company-Wide at Curve Analytics

- ▶ Develop Curve Analytics' internal AI capability — establishing delivery standards, LLM quality controls across a growing portfolio of client engagements.
- ▶ Support Curve Analytics' external AI consulting proposition: an end-to-end narrative spanning data foundation-setting, PoC experimentation, and agentic AI delivery — enabling scalable, repeatable client work.

AI PoC — Digital Commerce Analytics Platform · Global FMCG Client · Product Owner

- ▶ Led delivery of a LLM PoC in three months, securing buy-in by demonstrating clear feasibility and a path to value. Partnered with tech team to deliver an E2E system using Azure AI Foundry for intent recognition, planning and response generation, and Databricks Genie for SQL conversion and data retrieval.
- ▶ Contributed to the development of underlying business context partnering with domain experts forming the dynamic "ingredients" the agents drew from; and ran structured superuser testing cycles to improve output quality and build internal advocacy. Collaborated with UX to create prototypes of the future vision of the product in Figma.
- ▶ **Impact:** tasks previously taking 4–5 hours reduced to under a minute. PoC validated by superusers; MVP rollout approved with scope for role-based personalisation.

Digital Commerce Intelligence Platform · Global FMCG Client · Product Manager

- ▶ Led the end-to-end delivery of a global reporting platform for a major beverage brand, standardising 30+ KPIs across 20+ disparate data sources (Digital Shelf, Sales, and Web Performance).
- ▶ Orchestrated a cross-functional team of data engineers, UI/UX designers, and external vendors to transition 28 markets from manual to centralised reporting.
- ▶ **Impact:** 100% transition from manual to centralised reporting; reporting cadence accelerated from quarterly to weekly/monthly; full eNSV and category/brand-level insight enabled across all 28 markets, enabled first-of-its-kind cross-analysis of sales, Digital Shelf and Google Analytics Performance.

AI Content Orchestration Platform · Global Brand Client · Microsoft Partnership · Business Analyst

- ▶ Delivered an AI-powered content orchestration platform consolidating fragmented multi-agency brand workflows. Led vendor coordination, collaborated with AI engineer to develop the prompt governance design, and led cross-functional alignment across marketing, procurement, and technology.
- ▶ **Impact:** informed build vs buy decision; multi-agency workflows consolidated into a single governed platform driving asset reuse and cross-brand collaboration.

Always-On AI Insights Platform — Global Enablement · Adoption Programme Lead

- ▶ Designed and led a structured global enablement programme (tiered onboarding, executive briefings, self-serve documentation) for a newly deployed AI insights platform facing low adoption across a diverse, non-technical stakeholder base spanning multiple geographies.
- ▶ **Impact:** Successful adoption across 1,000+ stakeholders globally; AI-driven decision-making embedded as standard workflow with measurable uplift in self-service utilisation

Associate Consultant | Curve Analytics

May 2023 – Mar 2024

Product Owner — Quality Performance Dashboards

- ▶ Took full product ownership of four global dashboards consolidating consumer research and quality data for R&D and Product Quality teams — managing backlog, acceptance criteria, and sprint delivery in Azure DevOps. Owned the Statement of Work and client sign-off process.
- ▶ **Impact:** Reduced time-to-insight from weeks to under 7 days post-launch, enabling teams to identify and address product risks within a single reporting cycle.

Senior Customer Experience Executive | Relative Insight

Aug 2022 – May 2023

- ▶ Solutions Consultant - conducted trial research projects for prospective customers to demonstrate the capabilities of the Relative Insight platform.
- ▶ Developed strong research skills while gaining commercial experience in a fast-paced environment.
- ▶ **Impact:** Contributed to acquiring major clients, including Monzo Bank

Customer Success Executive | Relative Insight

Jan 2022 – Aug 2022

- ▶ Conducted comprehensive research projects across various industries, including Entertainment, FMCG, Education, Finance, Charity, and Healthcare.
- ▶ Delivered valuable insights that informed critical business decisions and contributed to thought leadership pieces. Developed qualitative and quantitative research skills while managing a diverse customer base, enhancing client relationships. Collaborated with notable clients like Universal Music, Atlantic Records, Nestle, Diageo

Business Development Executive (Commercial Associate) | Relative Insight Sep 2021 – Jan 2022

- ▶ Exceeded quota by 175% within the first full sales cycle. Channelled structured market intelligence back to product and technical teams, directly informing roadmap prioritisation.

TECHNICAL & PRODUCT SKILLS

AI & GenAI Familiarity: LLMs, Agentic AI, Prompt Engineering, RAG, Azure AI Foundry, Azure OpenAI, Databricks Genie, Copilot Studio, AI Governance & Responsible AI

Product: Product Strategy, Roadmapping, Agile/SAFe, Backlog Ownership, JTBD, PRD Authorship, RICE Prioritisation, OKRs, Feature Flagging, UAT

Data & Analytics: Kimball Data Modelling, KPI Standardisation, Analytics Governance, Enterprise Data Warehousing, Systems Integration

Tools: Azure DevOps, Power BI, Figma, SAP, Google Analytics, Shopify, MuleSoft, Stackline, Miro

Sectors: FMCG · Finance · Healthcare · Media · Digital Commerce

EDUCATION

MA Linguistics (Syntax Specialisation)

Oct 2020

University College London (UCL) · Dissertation: High Distinction (82%) · Weighted Average: 80.96%

Formal grounding in syntax and language structure directly informs LLM prompt design, conversational interface development, and AI product evaluation — a differentiating edge in GenAI delivery.

BA Philology — English Language & Literature

Jun 2019

Babeş-Bolyai University, Cluj-Napoca, Romania · Average: 9.68/10
